FLEET RANGE GUIDE

NISSAN FLEET. WE MEAN BUSINESS.

NISSAN FLEET. WE MEAN BUSINESS.

INTRODUCING OUR FLEET RANGE.

Here at Nissan, “We Mean Business”. Three of the key differences we believe you will experience when working with our specialist leasing and rental teams are that we are easy to do business with, committed to building a focused partnership with you and that our range of vehicles is popular with user-choosers as well as fleet operators.

In addition, we’re conscious of the pressures you face today and the impact your decisions may have on your fleet, customers and bottom-line tomorrow. With this in mind, we constantly evaluate the current and future fleet landscape to inform the development of our vehicles and Intelligent Mobility features – so we can provide you with compelling options.

Our latest models and upgrades reflect this, and we are proud to have won a number of awards across our fleet range to prove it. For example, Nissan Qashqai, which created the crossover segment, was named Auto Express ‘Car of the Past 30 Years’. It was also recognised by the UK Motor Awards for its significant contribution to the British car industry since 2007, winning Best British Built Car.

In addition, the business grade Qashqai Acenta Premium has introduced a range of intelligent safety features, and its new Euro6d-temp 1.3 DIG-T 140PS and 160PS petrol engines deliver class-leading residuals over 3 years / 30,000 miles of 50.1% and 48.6% respectively.

LEAF has taken the UK by storm, winning a number of awards for its impressive technology and being an undisputable reason to switch to EV. A 40kWh battery extends the LEAF’s range by 40% and its revolutionary e-Pedal comes as standard, for smoother, more relaxed driving.

We also have a broad range of LCVs, including our EV proposition the e-NV200 – which has the same 40kWh battery as the LEAF – delivering 60% more range than the previous generation. Its praises continue to be sung as it won Commercial Fleet ‘Zero Emission Van of the Year’ 2018, as well as ‘What Van? Green Van of the Year’.

Company Car Today awarded Nissan Micra with ‘Supermini of 2018’ and cited it is “...back to being a great option for business users.” Micra also won the Driver Power Survey 2018 ‘Gold Supermini’ award, winning five categories, including ‘Infotainment’ and ‘Connectivity and Electrics’.

We do hope you enjoy exploring the full range of WLTP ready Nissan crossovers, electric vehicles, light commercial vehicles and superminis featured in this guide.

370Z

THE ONE AND ONLY NISSAN Z.

Nissan's 'Z-car' has been a dominant force in sports coupes for more than four decades. The latest Nissan 370Z coupe traces its roots to the legendary 240Z that took the world by storm with its exceptional looks and powerful performance. Fast forward to today, and you'll find that the basic formula defining the 'Z' has stayed the same – now with a remarkable 328PS 3.7L V6 engine and a host of technological advances.

GT-R

THE ULTIMATE EVERYDAY SUPERCAR.

A LEGEND is not built on a lap time. Or a 0-62 number. It's built on obsessive attention to detail and a radical belief that a true supercar delivers performance in real-world conditions for anyone, anywhere, anytime. Perfectly refined yet brilliantly capable, in the right hands it can turn the automotive world on its head.

THE FUTURE IS ELECTRIC.

At Nissan we are proudly the pioneers in electric. The benefits of electric are beyond question; whether environmental, social, personal or financial, our electric vehicle range is equipped to suit you and your drivers.

THE NISSAN EV BATTERY: COST AND ENERGY EFFICIENCY

ELECTRIFYING TECHNOLOGY

The Nissan lithium-ion battery is compact, safe, powerful and durable, with a high recommendation rate from our electric customers. A highly innovative piece of technology, the battery pack is also 99% recyclable – at the end of its service in an electric vehicle it is dismantled, and its components sorted before being given a second life, supporting energy management and sustainability.

ELECTRIC IS PRICELESS

Driving electric is not just a way of driving. It's a way of life. Electric gives you complete control of your vehicle running costs, with reduced running costs especially in moving from point A to B, 20% fewer moving parts meaning a lower cost of maintenance, a lower breakdown risk, the ability to move freely around congested zones and to charge overnight to reduce the electricity bill. Money saved, life improved.

1. NissanConnect EV
2. Flat underbody aids aerodynamics
3. xStorage for business

THE RAPID RE-CHARGE

Not only is the Nissan electric 40kWh battery reliable and economical, but it's been built for your convenience. For those times when you need to get up and go, Nissan electric vehicles feature a Rapid Charge port which will allow you to charge from 20%-80% in around 60 minutes at a CHAdeMO rapid charger. Charging times may be affected by a number of factors such as charger type and ambient temperature.

THE FUEL STATION OF THE FUTURE

At Nissan, our vision is that renewable energy will be used to power not just electric vehicles, but homes, offices, and even entire cities. Rather than continue to use fossil fuels that harm our environment and cause irreversible damage that will be detrimental to future generations, our innovative proposal is to leverage natural energy through cars to provide for our energy needs and reclaim the green spaces where power stations were built.

VEHICLE TO GRID (V2G)

Nissan is piloting the effectiveness of the vehicle to grid system (V2G) in different European cities. Drivers can connect their electric vehicles to the grid during cheap-tariff periods, and use the electricity stored in the vehicle's battery to power the work place or sell back to the grid.

CHARGE HERE, THERE AND EVERYWHERE

When you need to charge your electric vehicle, our vast infrastructure of charging points makes it easy. There are currently more than 6,500 Nissan Quick Chargers located across Europe, and with new partners helping to provide accessible EV stations everywhere. Quick-charging your vehicle takes the same amount of time as grabbing the ingredients for dinner, so it's business as usual.

NISSAN ENERGY SOLAR

WHAT IS NISSAN ENERGY SOLAR?

Nissan Energy Solar is a portfolio of energy generation and storage solutions that give you access to safe, reliable and sustainable energy. The xStorage Home storage unit gives Nissan's electric vehicle batteries a 'second life'. By partnering with Eaton, we provide scalable energy storage systems fit for your homes and your business, allowing all of us to benefit from the transition towards a more sustainable society.

xStorage can also be scaled to support your businesses with an innovative, flexible solution for managing energy costs through intelligent energy storage allowing to optimise the cost of energy whether from the grid at off peak times or from renewable sources such as solar or wind.

INTELLIGENT MOBILITY.

Imagine a whole new driving experience, moving through life with greater exhilaration, confidence, and connection to the world around you. This is Nissan Intelligent Mobility, and it's already a reality in Nissans you can drive today – in cars that park themselves, watch what's happening around you, and step in to keep you out of trouble.

NISSAN INTELLIGENT MOBILITY TECHNOLOGIES*

PROPILOT

Activate ProPILOT to let your car automatically follow the car ahead at a pre-set distance and keep you centred in your lane (even around a gentle curve). ProPILOT can even bring your car to a complete stop based on the traffic flow, then take it back up to speed when traffic moves again.

PROPILOT PARK

Push the ProPILOT Park button to let your car take control of steering, acceleration, braking, and shifting to automatically manoeuvre into a parking spot.

INTELLIGENT FORWARD COLLISION WARNING

Watches two cars ahead and warns you to slow down, before you can even see what's stopping traffic.

INTELLIGENT BLIND SPOT INTERVENTION

Change lanes with confidence. This feature spots a vehicle in the blind spot area, and gives you a nudge back if you start to move over.

INTELLIGENT LANE INTERVENTION

Keeps you between the lines if you start to drift out of your lane.

DRIVING CONTROL AND STABILITY

INTELLIGENT BACK-UP INTERVENTION

Looks out behind you and automatically brakes for things you can't see.

INTELLIGENT AROUND VIEW MONITOR

Tight parking space? Now you have a bird's eye view of your surroundings, so you can see what you might have missed.

Using 4 cameras the Intelligent Around View Monitor delivers a panoramic view, making reversing and parking easier.

INTELLIGENT DISTANCE CONTROL

Monitors the flow of traffic, so you're always following at a safe distance.

HIGH BEAM ASSIST

See better at night without blinding your fellow drivers. High Beam Assist automatically turns on the high beam headlights when you need them, and switches to low beam when it detects a vehicle ahead.

TRAFFIC SIGN RECOGNITION

The Traffic Sign Recognition system detects road signs as you go along and displays the speed limit on the digital information display.

HILL START ASSIST

When you're on a steep hill, there's always that car behind that's too close for comfort. Thankfully, hill start assist helps stop you from rolling backwards. It holds brake pressure for a few seconds, giving you enough time to switch from the brake pedal to the accelerator.

INTELLIGENT TRACE CONTROL

Enjoy hugging curves with handling that feels effortless. Intelligent Trace Control reads the situation and, if needed, brakes each wheel individually to help you steer an optimal line through the turn.

INTELLIGENT RIDE CONTROL

Smooth out the bumps in the road. Intelligent Ride Control can automatically apply the brakes and adjust engine torque to smooth out your ride.

E-PEDAL

Accelerate, brake and come to a complete stop all with one pedal. The effortless e-Pedal is all you need in the New Nissan LEAF. It's simple, fun and gives you more control too.

* Not all features are available on all models and grades. You should not rely solely on driver convenience features. Some features may not work in all conditions and circumstances. Speed and other limitations apply. For terms and conditions relating to Nissan technologies, please visit www.nissan.co.uk/legal/terms-conditions.html#technology

DEDICATED SERVICES.

Our Fleet Customer First Aftersales Charter* is designed to support you every step of the way. Whether you're looking for regional labour rates, mobility support, goodwill, service booking guarantees or dedicated fleet customer support, we'll ensure your Aftersales requirements are met to the highest possible standard. All backed by our 3 year/60,000 miles (cars) or 5 years/100,000 miles (vans) manufacturer warranty with Lifetime Assistance.

* Participating dealers only.

THE SUPPORT YOU NEED FOR SUCCESS

Nissan Business Centres are strategically located across the UK and our experienced fleet and business car specialists are on hand to give you the support you need. This includes providing expert advice on choosing the right vehicles and financing to meet the needs of your business and becoming your one-stop-shop for all of your specific ongoing requirements.

OUR BUSINESS IS TO KEEP YOUR BUSINESS ON THE ROAD

The Nissan Aftersales team is there to provide support, give advice and help with maintenance. Highly trained, they use their expertise to make sure your Nissan fleet is efficient and successful from day one, and throughout your ownership.

Whether you're running a single van, a small fleet of cars, or a large number of mixed vehicle types, our aftersales programmes are tailored to keep your fleet moving with rapid-response service checks, preferential booking, extended workshop hours, courtesy vehicles, and a delivery/collection service.

FLEET CUSTOMER SERVICING

When it comes to servicing, Nissan dealers deliver on what our business customers need – tailored servicing plans, with fast turnaround, fixed prices and guaranteed work. We won't waste your time – or your money.

SUPPORT AND ASSISTANCE

Flexible opening hours and a central fleet hotline help to relieve the stress of urgent servicing or repair requirements – and your Nissan dealer will provide a replacement vehicle while they carry out work under warranty.

NISSAN WARRANTIES

We want to put your mind at rest, so you can enjoy your new Nissan fleet. Our warranties ensure that, within the period of time or the mileage specified, an authorised dealer anywhere in the UK will repair or replace, free of charge, any defective parts that are covered by the guarantee. Nissan cars are protected by a 3-year/60,000 miles warranty, and commercial vehicles by a 5-year/100,000 miles warranty. For further details, contact your local Nissan dealer.

* WLTP figures shown are for comparability purposes; only compare figures with vehicles tested to the same technical procedures. Actual real world driving results may vary depending on factors such as weather conditions, driving styles, vehicle load or any accessories fitted after registration. WLTP is a new test used for fuel consumption and CO₂ figures however until April 2020 the CO₂ figures are based on the outgoing (NEDC) test cycle which will be used to calculate vehicle tax on first registration.

** The CO₂ figures are based on the outgoing (NEDC) test cycle which will be used to calculate vehicle tax on first registration.

Passenger Cars – NEDC Fuel Economy

Model	Fuel economy mpg*						Emissions*	
	Urban		Extra-urban		Combined		CO ₂ (g/km)	
	From	To	From	To	From	To	From	To
X-Trail	34.9	48.7	51.4	61.4	44.1	55.4	149	133

* NEDC figures shown are for comparability purposes; only compare figures with vehicles tested to the same technical procedures. Actual real world driving results may vary depending on factors such as weather conditions, driving styles, vehicle load or any accessories fitted after registration.

Commercial Vehicles – NEDC Fuel Economy

Model	Fuel economy mpg*						Emissions*	
	Urban		Extra-urban		Combined		CO ₂ (g/km)	
	From	To	From	To	From	To	From	To
Navara	32.5	43.5	46.3	48.7	41.0	46.3	183	159
NV200	49.6	51.4	61.4	61.4	56.5	57.6	131	130
NV300 Van / Crew Van	N/A	N/A	N/A	N/A	40.9	47.9	178	155
NV300 Platform	N/A	N/A	N/A	N/A	40.9	40.9	178	178
NV400	N/A	N/A	N/A	N/A	30.4	40.9	242	179

* NEDC figures shown are for comparability purposes; only compare figures with vehicles tested to the same technical procedures. Actual real world driving results may vary depending on factors such as weather conditions, driving styles, vehicle load or any accessories fitted after registration.
