# FLEET RANGE GUIDE

**NISSAN FLEET.** WE MEAN BUSINESS.

**NISSAN FLEET.** WE MEAN BUSINESS.

# INTRODUCING OUR FLEET RANGE.

Welcome to the latest edition of our Fleet Range Guide.

Here at Nissan, three of the key differences we believe you will experience when working with your dedicated Corporate Fleet Team are that we are leaders in helping fleets make the switch to electric, we are easy to do business with, and we have a wide range of vehicles to suit your varying business needs.

We have been at the forefront of developing electric vehicles since 1947 and are proud to have won a whole host of awards for the Nissan LEAF, including 'Electric Car Of The Year' in Company Car Today's CCT100 2019 Awards. In addition, our e-NV200 has just won Commercial Fleet's 'Zero emission LCV' award, and our 'Sky to Scoop' ice cream van campaign picked up four award wins at Public Relations and Communications Association Awards and Energy Awards.

Thanks to recent government tax changes, the Nissan LEAF and e-NV200 Combi will benefit from 0% BIK from April 2020. This applies to any vehicle registered today. We have stock available now across our range, so there has never been a better time to electrify your fleet.

Our electric vehicle expertise has enabled us to provide a range of tools and guidance to help our corporate customers decide if making the switch to EV is a viable option. You can find out more at [www.nissancorporate.co.uk/evleadership](http://www.nissancorporate.co.uk/evleadership)

Have you had the chance to explore the Nissan Fleet Hub? Designed to help make running your fleet easier, you'll find key information and support in one convenient place. As well as viewing the latest updates from

<sup>1</sup> NissanConnect featuring Apple CarPlay® and Google Android Auto® standard on Acenta grade and above. NissanConnect should only be used when the car is parked safely. Use of the system should always be in accordance with the rules of the Highway Code. Drivers should only use the system when it is safe to do so. Users should be aware of the potential for handsfree technology to distract attention from the road, which could impact on having full control of the vehicle. For compatible devices, please visit [www.nissan.co.uk/legal/terms-conditions](http://www.nissan.co.uk/legal/terms-conditions).

<sup>2</sup> Bose® Personal® Plus standard on Tekna grade and above.

<sup>3</sup> ProPILOT is only available on Automatic transmissions. ProPILOT is an Advanced Driver Assist technology, but cannot prevent collisions. ProPILOT is intended for 'Eyes on/Hands On' for highways only (road separated by barriers). It is the driver's responsibility to stay alert, drive safely and be able to take control of the vehicle at any time. ProPILOT standard on Tekna grade and above/ optional on N-Connecta grade.

Nissan Fleet, you can create fleet-specific vehicle specification documents anytime, anywhere. What's more, you have the convenience of a secure private area to store and share files and documents.

We're excited to confirm that the Next Generation Nissan Juke is now available. Its refined, spacious interior and cutting-edge design makes a powerful statement wherever it goes. Advanced technology - including NissanConnect<sup>1</sup>, Bose® Personal® Plus<sup>2</sup> and ProPILOT driving assistance, which helps to keep drivers safer and more connected<sup>3</sup>. With CO<sub>2</sub> from just 110g/km\* and MPG of up to 47.9 for combined driving<sup>5</sup>, it's a great fit for fleets.

The tough and smart Nissan Navara has been named 'Pickup of the Year' in Fleet World's 2019 'Great British Fleet' Awards, won Honest John's 2019 'Most Popular Pick-up' award, and was described as 'one of the best pick-ups on the market' by 4x4 Magazine after winning the prize for '2020 Pick-up of the Year'. Latest upgrades include an all-new 6-speed manual cable-shift transmission and a 5 link rear suspension with dual stage coil springs. Best of all, when good news can seem in short supply, the Nissan Navara isn't. We have all you need, in stock now.

We do hope you enjoy exploring the full range of WLTP ready Nissan electric vehicles, crossovers, light commercial vehicles and superminis featured in this guide. If we can do anything to help, then please don't hesitate to reach out to one of our Corporate Account Managers, either through the Nissan Fleet Hub or by visiting [www.nissan.co.uk/corporate-sales/contact](http://www.nissan.co.uk/corporate-sales/contact).

## Nissan Fleet Team

\* CO<sub>2</sub> from 110g/km available on Next Generation Nissan Juke N-Connecta DIG-T 117 DCT. COMBINED 46.3 MPG (6.1L/100km), CO<sub>2</sub> emissions 110g/km.

<sup>5</sup> Up to 47.9MPG available on Next Generation Nissan Juke N-Connecta DIG-T 117 Manual. COMBINED 47.9 MPG (5.9L/100km), CO<sub>2</sub> emissions 112g/km. Figures shown are for comparability purposes and may not reflect real driving results.

You should not rely solely on driver convenience features. Some features may not work in all conditions and circumstances. Speed and other limitations apply. For terms and conditions relating to Nissan technologies please visit [www.nissan.co.uk/techterms](http://www.nissan.co.uk/techterms).

# 370Z 2020

## THE ONE AND ONLY NISSAN Z.

Nissan's 'Z-car' has been a dominant force in sports coupes for five decades. The latest Nissan 370Z coupe traces its roots to the legendary 240Z that took the world by storm with its exceptional looks and powerful performance. Fast forward to today, and you'll find that the basic formula defining the 'Z' has stayed the same – now with a remarkable 328PS 3.7L V6 engine and a host of technological advances.

# GT-R 2020

## THE ULTIMATE EVERYDAY SUPERCAR.

A LEGEND is not built on a lap time. Or a 0-62 number. It's built on obsessive attention to detail and a radical belief that a true supercar delivers performance in real-world conditions for anyone, anywhere, anytime. Perfectly refined yet brilliantly capable, in the right hands it can turn the automotive world on its head.

# NV250

## THE SMALL VAN WITH A BIG INSIDE.

The new Nissan NV250 is the perfect compact van for small businesses with big aspirations. NV250 is offered in two body types, Panel Van or Crew Van, with three engine outputs (80PS, 95PS and 115PS) and two body lengths (L1/L2). By enabling customers to choose the version that is just right for them, the NV250 encourages more agile business deliveries and greater leisure freedom. Thanks to the industry-leading five year / 100,000-mile warranty, the NV250 ensures today's business owners are ready for anything.

# THE FUTURE IS ELECTRIC.

At Nissan we are proudly the pioneers in electric. The benefits of electric are beyond question; whether environmental, social, personal or financial, our electric vehicle range is equipped to suit you and your drivers.

## THE NISSAN EV BATTERY: COST AND ENERGY EFFICIENCY

### ELECTRIFYING TECHNOLOGY

The Nissan lithium-ion battery is compact, safe, powerful and durable, with a high recommendation rate from our electric customers. A highly innovative piece of technology, the battery pack is also 99% recyclable – at the end of its service in an electric vehicle it is dismantled, and its components sorted before being given a second life, supporting energy management and sustainability.

### ELECTRIC IS PRICELESS

Driving electric is not just a way of driving. It's a way of life. Electric gives you complete control of your vehicle running costs, with reduced running costs especially in moving from point A to B, 20% fewer moving parts meaning a lower cost of maintenance, a lower breakdown risk, the ability to move freely around congested zones and to charge overnight to reduce the electricity bill. Money saved, life improved.

1. NissanConnect EV  
2. Flat underbody aids aerodynamics  
3. xStorage for business

### THE RAPID RE-CHARGE

Not only are Nissan electric vehicle batteries reliable and economical, but they have been built for your convenience. For those times when you need to get up and go, Nissan electric vehicles feature a Rapid Charge port which will allow you to charge a 40kWh battery from 20%-80% in around 60 minutes at a CHAdeMO rapid charger. Charging times may be affected by a number of factors such as charger type and ambient temperature.

### THE FUEL STATION OF THE FUTURE

At Nissan, our vision is that renewable energy will be used to power not just electric vehicles, but homes, offices, and even entire cities. Rather than continue to use fossil fuels that harm our environment and cause irreversible damage that will be detrimental to future generations, our innovative proposal is to leverage natural energy through cars to provide for our energy needs and reclaim the green spaces where power stations were built.

### NISSAN ENERGY SOLAR

Nissan Energy Solar is a portfolio of energy generation and storage solutions that give you access to safe, reliable and sustainable energy. The xStorage Home storage unit gives Nissan's electric vehicle batteries a 'second life'. By partnering with Eaton, we provide scalable energy storage systems fit for your homes and your business, allowing all of us to benefit from the transition towards a more sustainable society.

xStorage can also be scaled to support your businesses with an innovative, flexible solution for managing energy costs through intelligent energy storage allowing to optimise the cost of energy whether from the grid at off peak times or from renewable sources such as solar or wind.

### VEHICLE-TO-GRID (V2G)

Vehicle-to-grid technology enables drivers to charge their EV batteries during off-peak periods and use the stored energy to power homes and workplaces at times of peak demand, or for selling back to the grid. Through V2G, the collective power of Nissan electric vehicle fleets can be harnessed to support the transition to a smarter, more sustainable energy system.

In the UK, Nissan and OVO Energy are working together to deploy V2G chargers to homes as part of the world's first large-scale residential trial. The trial will demonstrate how V2G can unlock flexibility on the electricity network and save Nissan EV drivers money on their energy bills.

As part of the trial, participants will receive:

- A state-of-the-art vehicle-to-grid charger – including installation – at no cost.
- A £75 credit on their first energy bill.
- Up to 30p per kWh on all energy exported back to the grid – enabling savings of up to £570 off annual energy bills\*.

For further details and full terms & conditions visit [www.ovoenery.com/v2g](http://www.ovoenery.com/v2g), phone 0330 102 7423 or e-mail [v2g@ovoenery.com](mailto:v2g@ovoenery.com).

\*£570 saving has been calculated by OVO Energy based on cost comparison of a user with a single rate tariff of 15p, covering 8000 miles per annum without vehicle-to-grid, compared with a vehicle-to-grid customer receiving 30p/kWh for exported energy, on the OVO 2 Year Fixed Energy tariff, same energy and mileage profile and their vehicle exporting at a rate of 5.6kW between 4-7pm, 7 days a week. Savings are an estimate only and actual costs will vary according to your region and usage. All rates correct as of 25/11/2019.

# INTELLIGENT MOBILITY.

Imagine a whole new driving experience, moving through life with greater exhilaration, confidence, and connection to the world around you. This is Nissan Intelligent Mobility, and it's already a reality in Nissans you can drive today – in cars that park themselves, watch what's happening around you, and alert you to help keep you safer and more in control.

## NISSAN INTELLIGENT MOBILITY TECHNOLOGIES\*

### PROPILOT

Activate ProPILOT to let your car automatically follow the car ahead at a pre-set distance and keep you centred in your lane (even around a gentle curve). ProPILOT can even bring your car to a complete stop based on the traffic flow, then take it back up to speed when traffic moves again.

### PROPILOT PARK

Push the ProPILOT Park button to let your car take control of steering, acceleration, braking, and shifting to automatically manoeuvre into a parking spot.

### INTELLIGENT FORWARD COLLISION WARNING

Watches two cars ahead and warns you to slow down, before you can even see what's stopping traffic.

### INTELLIGENT BLIND SPOT INTERVENTION

Change lanes with confidence. This feature spots a vehicle in the blind spot area, and gives you a nudge back if you start to move over.

### INTELLIGENT LANE INTERVENTION

Helps to keep you between the lines if you start to drift out of your lane.

### INTELLIGENT BACK-UP INTERVENTION

Looks out behind you and automatically brakes for things that may be in your blind spot.

### INTELLIGENT AROUND VIEW MONITOR

Tight parking space? Now you have a bird's eye view of your surroundings, so you can see what you might have missed.

Using 4 cameras the Intelligent Around View Monitor delivers a panoramic view, making reversing and parking easier.

### INTELLIGENT DISTANCE CONTROL

Monitors the flow of traffic, so you're always following at a safe distance.

### HIGH BEAM ASSIST

See better at night without blinding your fellow drivers. High Beam Assist automatically turns on the high beam headlights when you need them, and switches to low beam when it detects a vehicle ahead.

### TRAFFIC SIGN RECOGNITION

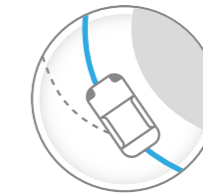

The Traffic Sign Recognition system detects road signs using the vehicle cameras and displays the speed limit on the digital information display.

## DRIVING CONTROL AND STABILITY

### HILL START ASSIST

When you're on a steep hill, there's always that car behind that's too close for comfort. Thankfully, hill start assist helps to prevent you from rolling backwards. It holds brake pressure for a few seconds, giving you enough time to switch from the brake pedal to the accelerator.

### INTELLIGENT TRACE CONTROL

Enjoy hugging curves with handling that feels effortless. Intelligent Trace Control reads the situation and, if needed, brakes each wheel individually to help you steer an optimal line through the turn.

### INTELLIGENT RIDE CONTROL

Smooth out the bumps in the road. Intelligent Ride Control can automatically apply the brakes and adjust engine torque to smooth out your ride.

### E-PEDAL

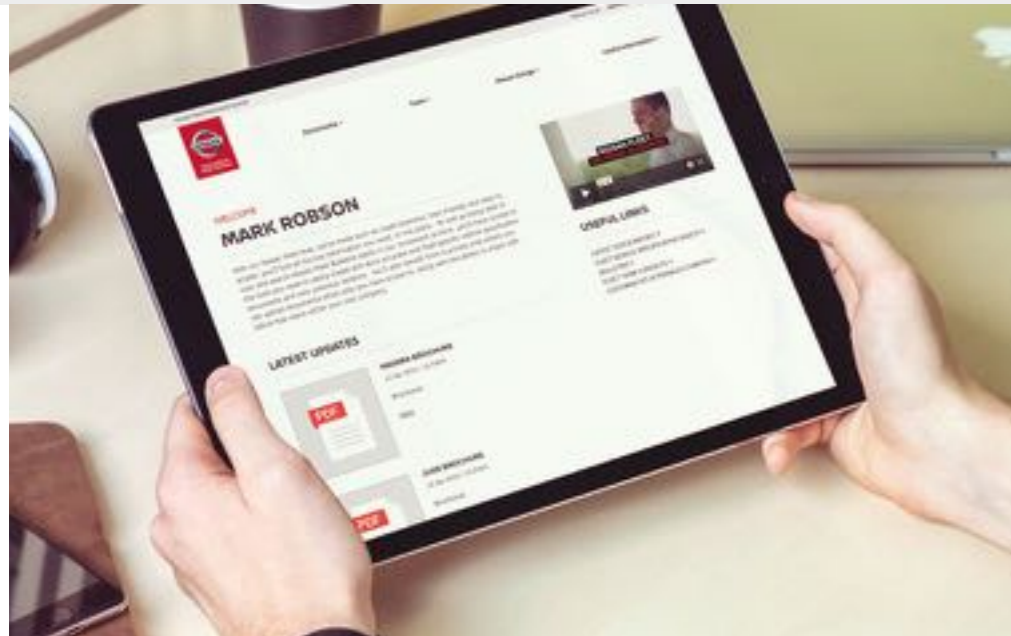

Accelerate, brake and come to a complete stop all with one pedal. The effortless e-Pedal is all you need in the New Nissan LEAF. It's simple, fun and gives you more control too.

\* Not all features are available on all models and grades. You should not rely solely on driver convenience features. Some features may not work in all conditions and circumstances. Speed and other limitations apply. For terms and conditions relating to Nissan technologies, please visit [www.nissan.co.uk/legal/terms-conditions.html#technology](http://www.nissan.co.uk/legal/terms-conditions.html#technology)

# DEDICATED SERVICES.

With the Nissan Fleet Hub, we've created an environment where it's easy to do business with us. You'll find a host of features that will help you manage your fleet, including a convenient archive of Nissan Fleet Bulletins and the tools to easily create and store fleet-specific vehicle specification documents and view previous versions. As well as the convenience of secure access to a private area where you can easily store files and documents, you can also share information with fellow Hub users within your organisation – ensuring seamless collaboration.

## THE SUPPORT YOU NEED FOR SUCCESS

Nissan Business Centres are strategically located across the UK and our experienced fleet and business car specialists are on hand to give you the support you need. This includes providing expert advice on choosing the right vehicles and financing to meet the needs of your business and becoming your one-stop-shop for all of your specific ongoing requirements.

## OUR BUSINESS IS TO KEEP YOUR BUSINESS ON THE ROAD

The Nissan Aftersales team is there to provide support, give advice and help with maintenance. Highly trained, they use their expertise to make sure your Nissan fleet is efficient and successful from day one, and throughout your ownership.

Whether you're running a single van, a small fleet of cars, or a large number of mixed vehicle types, our aftersales programmes are tailored to keep your fleet moving with rapid-response service checks, preferential booking, extended workshop hours, courtesy vehicles, and a delivery/collection service.

## FLEET CUSTOMER SERVICING

When it comes to servicing, Nissan dealers deliver on what our business customers need – tailored servicing plans, with fast turnaround, fixed prices and guaranteed work. We won't waste your time – or your money.

## SUPPORT AND ASSISTANCE

Flexible opening hours and a central fleet hotline help to relieve the stress of urgent servicing or repair requirements – and your Nissan dealer will provide a replacement vehicle while they carry out work under warranty.

## NISSAN WARRANTIES

We want to put your mind at rest, so you can enjoy your new Nissan fleet. Our warranties ensure that, within the period of time or the mileage specified, an authorised dealer anywhere in the UK will repair or replace any defective parts that are covered by the guarantee. Nissan cars are protected by a 3-year/60,000 miles (whichever comes sooner) warranty, and commercial vehicles by a 5-year/100,000 miles (whichever comes sooner) warranty. For further details, contact your local Nissan dealer.

## AFTERSALES SUPPORT

Our Fleet Customer First Aftersales Charter\* is designed to support you every step of the way. Whether you're looking for regional labour rates, mobility support, goodwill, service booking guarantees or dedicated fleet customer support, we'll ensure your Aftersales requirements are met to the highest possible standard. All backed by our 3 year/60,000 miles (whichever comes sooner) (cars) or 5 years/100,000 miles (whichever comes sooner) (vans) manufacturer warranty with Lifetime Assistance.

\* Participating dealers only.
